THE COMPANY

What BBLC is building

Blockchain Loyalty Corp is a technology holding company that connects compute, capital, trading, and intelligence under a single OTC-quoted entity. The Open Access Grid brand system unifies six divisions while letting each one serve its own market.

COMPUTE

InfernoGrid

GPU compute marketplace turning idle hardware into on-demand AI infrastructure.

CAPITAL

Koilink + Capistral

Deal-flow and corporate visibility platforms linking issuers, brokers, and investors.

EXECUTION

Orvexa

Premium self-directed trading platform with institutional-grade order entry.

DISCOVERY

iSwiped + TradeDNA

Card-based and AI-powered discovery tools that match investors with opportunities.

INVESTMENT HIGHLIGHTS

Why investors are looking at BBLC

- Diversified infrastructure holding company with exposure to AI compute, fintech, trading, and intelligence.
- Two divisions already live and generating revenue while the portfolio is consolidated and relaunched.
- Open Access Grid brand system creates a credible, institution-friendly identity without losing retail accessibility.
- Public OTC structure gives investors liquidity and transparency uncommon in private venture portfolios.
- Cross-sell potential between divisions: investors become traders, issuers become compute buyers, data feeds every surface.
- Management focus on clean capital structure and capital-efficient execution.

USE OF FUNDS

Where new capital would be deployed

Specific amounts, valuation, and security terms are available in the password-protected data room. The table below shows the planned allocation framework.

Category	**Planned allocation**	**Purpose**
Compute and GPU infrastructure	[TBD]	GPU cluster capacity, inference nodes, network backbone, and storage for AI, trading, and market-data workloads.
Product and engineering	[TBD]	Complete rebuilds of InfernoGrid and Koilink; iSwiped public launch.
Sales and marketing	[TBD]	Division user acquisition, brand awareness, and investor relations.
Compliance and legal	[TBD]	Securities counsel, platform terms, audit, and regulatory readiness.
Operations and support	[TBD]	Hosting, security, data feeds, support, and core team expansion.
Strategic reserves	[TBD]	Working capital and opportunistic partnerships.

ROADMAP

Key catalysts

Q4 2026

Brand and IR lock

Open Access Grid goes live across all properties. Investor relations portal and outreach campaign begin.

Q1 2027

Division launches

Koilink and InfernoGrid relaunch. iSwiped opens to public investors. Orvexa and Capistral scale.

Q2 2027

Revenue reporting

First consolidated division-level revenue and user metrics published to shareholders.

Q3 2027

Expansion

Strategic partnerships, additional market access, and potential tuck-in acquisitions.

NEXT STEP

Request investor access

Qualified investors can request the full data room, management deck, and calendar invite for upcoming calls.
